Operating System: Windows 2000

Windows XP

Windows Vista

Windows7

with Microsoft .Net Framework (runtime system) version 2.0 or higher

(Download link for .Net:

<http://www.microsoft.com/downloads/details.aspx?familyid=0856EACB-4362-4B0D-8EDD-AAB15C5E04F5&displaylang=en>)

Graphics: Screen resolution 1024 x 768 or higher

2.0 Install and Uninstall

2.0.1 Installation

- a) Please save the file "RouletteMonitorSetup.zip" to a folder (e.g. C:\Temp) and unzip it.
 - b) Execute RouletteMonitorSetup.msi (Double click or right-click and install)
- After running the installation file the following dialog appears:

- c) Click „Next“

- d) Please select an installation path or accept the default path by clicking "Next"

- e) Click „Next“
- f) The software is now installed. After a while you'll get:

- g) At the top left, an activation code (brown). Please note the brown activation code (in this example: **6fc83d5ef8**) and send to the specified email address: activation@TheWebStore.de.
- h) You can now finish the installation with "exit". Please confirm the next windows with "Next".
- i) Once you have received the license key, please run the installation (steps: a-f) again.

j) Window „License verification“

Enter the license key received via email. (e.g: 1a2s3d4f5f) and click "activate".

k) Click „OK“

l) Complete the installation with "Close". **The software is now ready for use.**

2.0.2 Uninstallation

Please navigate to the Control Panel and select software or programs and features. From the list, Please select "Roulette Monitor" and click "Uninstall".

Alternatively, you can uninstall the software by double-clicking the "RouletteMonitorSetup.msi."

3.0 Description

The program is started either by double clicking on Program/Monitor Roulette/Roulette Monitor or using the desktop shortcut.

3.0.0 Complete overview:

3.0.1 Input section:

On the left side of the program frame are the input fields. The white field "Count" shows the number of the entered Coups.

The image shows a software interface titled "Roulette Monitor". At the top, there is a "Count:" label followed by a white text box containing the number "74". Below this is a grid of 37 numbers (0 to 36) arranged in a 6x3 layout. The numbers 0 and 00 are in green boxes, while the others are in red or black boxes. Below the grid is a button labeled "undo". At the bottom, there is a row of three orange boxes containing the numbers "0", "17", and "00", and a button labeled "reset all".

With the "undo" button inputs can be undone.

3.0.2 Output section – outside bets (1:1)

The upper part of the program shows the distribution of Simple Chances:

Rouge (red) und Noir (black),

Pair (even) und Impair (odd), and

Manque (1-18) und Passe (19-36).

The upper progress bars shows absolute values, thus refers to all the fallen numbers.

The bottom progress bar shows the relative values. It will be analyzed only the last 25 numbers.

Blue) in the middle (which are used to calculate maximum values shown (without zero).

Please note that the calculation does not take into account the zero and double-zero. Therefore, the sum of the two progress bar values can be smaller than the number of coups.

3.0.3 Output section – outside bets (2:1)

On the right side of the program, the distribution of 2:1 chances is displayed:

Dozen 12 P-M-D bets:

The first (1-12), second (13-24), or third group (25-36) of twelve numbers.

Column 34 35 36 bets:

All 12 numbers on any of the three vertical lines (such as 1-4-7-10 on down to 34).

The upper progress bar of the bar pair shows the absolute values, while the lower progress bars the values for the 25 coups displays. On the left of the progress bar pairs, the distribution of frequency is shown in percent.

Please note that the calculation does not take into account the zero and double-zero. Therefore, the sum of the two progress bar values can be smaller than the number of coups.

3.0.4 Output section – inside bets

In the middle of the program, the data of 1-36 and 0 coups (straight-up) are listed.

On the right side of each progress bar the number of the coups is counted. The most fallen coups, is portrayed as full scale.

e.g.

1 is fallen 10 times, 10 times the maximum value, the progress bar is shown full scale (100%)

10 is fallen 3 times, the progress bar shows about 30% deflection

30 is fallen 7 times, the progress bar indicates an approximately 70%

3.0.5 Treadmill display, reset and Exit Button

The lower part of the program shows a treadmill with the last 20 coups. Any new set enter left and moves to right.

With the button "reset all" the program will reset all to zero. All typed data is deleted.

With the "exit" button, the program is terminated. All entered values are lost. On the next start, the program starts again virgin.
